

SHAURYA ROHATGI

State College, PA · szr207@psu.edu · +14846325122 · [Homepage](#)

RESEARCH INTERESTS

Natural Language Processing, Information Retrieval and Machine Learning

EDUCATION

Pennsylvania State University - Cohort Fall'17

State College, PA

Key Courses: Deep Learning, Artificial Intelligence, NLP, Information Retrieval, Data Mining

GPA: 3.56/4.0

PhD - Information Sciences and Technology

August, 2017 - Present

Indian Institute of Information Technology and Management

Gwalior, MP, India

Key Courses: Operating Systems, Data Structures,

Design and Analysis of Algorithms

GPA: 6.96/10

Integrated Post Graduate - Information Technology

June, 2014

EXPERIENCE

The Intelligent Information Systems Research Laboratory

State College, PA

Research Assistant

January, 2018 — Present

1. MathSeer - Indexing and Searching Math in academic documents at Scale (Current Research Focus)
2. Crawling at scale - Crawled 10M open-access documents
3. Deploying and maintaining **CiteSeerX** (Serving 3M users yearly)

TCS Research

Noida, UP, India

Researcher

December 2014 — July 2017

1. Dialogue based systems (NLU)
 - worked on multiple chat agents/bots' answers were retrieved from RDF
 - reduced the number of tickets of the IT support team by 30%.
2. Created a novel 2 stage clustering method for the emails of which reported an F-Measure of 75%.

RESEARCH PROJECTS

CovidSeer:

Spring'20

Models and Technologies used - *ElasticSearch and Django*

Build a Search Engine for academic articles related to COVID-19 using the CORD dataset.[\[link\]](#)[\[code\]](#)

Microsoft Malware Detection Challenge:

Fall'18

Did exploratory data analysis of data and used random forests to predict and understand what factors are most important in identifying malware affected computers. [\[slides\]](#)[\[report\]](#)

Deception Detection in Online Dating:

Spring'18

Trying to identify characteristics of people on dating apps who are in relationships and cheating on their partners. OkCupid dataset was analysed and a random forest was used to identify. Our method reported F1 score of 0.94 [\[slides\]](#)[\[code\]](#)

Text Normalization:

Fall'17

Models and Technologies used - *Tensorflow, XGBoost, Seq2Seq model*

Prediction of the classification algorithm is used by our sequence-to-sequence model to predict the normalized text of the input token. Ranked among the top 50 in the Kaggle Competition.[\[code\]](#)[\[slides\]](#)

Fake News Detection:

Fall'17

Models and Technologies used - *Keras, Tensorflow, Spacy, word2vec*

Detected unreliable news and we train and report our results on the dataset provided by the AICS'18 Workshop challenge. Our Deep Learning model reports an accuracy of 93% which is better than the baseline (86%). [\[report\]](#)[\[code\]](#)[\[slides\]](#)

Math Information Retrieval using CNNs: As a part of my thesis research, we encode math formula images using convolutional autoencoders. These encodings are then used for math information retrieval. [\[code\]](#)

AWARDS

Winner AccuWeather Challenge at HackPSU'18 - WeatherOrNot

State College, PA

Weather Assisted smart travel suggestions

1st prize winner at HackPSU'17 - FindVisor (IBM Watson Runner Ups)

State College, PA

Created a web application which suggests a research adviser for graduate students and ranked professors relevant to them.

Winner Nittany AI Challenge'18 - ProFound: A Professor Search Engine

State College, PA

Team Lead - Project was funded for \$17,500 and has received support from the

Office of Research and College of Medicine, The Pennsylvania State University ([homepage](#))

SKILLS

Packages, OS and frameworks: PyTorch, Keras, Tensorflow, Apache Hadoop,

ElasticSearch, Linux, Scrapy, Heritrix

Programming Languages: Python, Java, C, C++

Machine Learning by Stanford University on Coursera: [Certificate](#)

Neural Networks and Deep Learning by deeplearning.ai on Coursera: [Certificate](#)

OTHER PROJECTS

GetEmployed

Summer'11

Software Developer - Trainee

- An online Job Portal for a better interaction between job seekers and Employers

- Technologies Used: Struts Framework, Tiles Framework, JSP, JSTL, Apache Tomcat, JavaScript, Net Beans, MySQL

KDD Cup'2016

Spring'16

Team Name - TCSRN

- Task - Whose papers are accepted the most,

towards measuring the impact of research institutions - Key Contributions - Feature Engineering, Data Preprocessing

- Overall World Rank - 23 - [\[Result Link\]](#)

TEACHING EXPERIENCE

Instructor - IST 441

Spring'18

- helped design and was the primary instructor for the lab

[Information Retrieval and Search Engines.](#)

- Students were taught how to crawl the web using Scrapy and build a search engine with the crawled documents using ElasticSearch.

Teaching Assistant - IST 230-003

Fall'17

Language, Logic, and Discrete Mathematics
